Recycling means treating things that have already been used, so that they can be used again. Aluminum and steel cans, cardboard, glass, newspapers and plastic bottles are all recyclable materials. These items can be made into new things such as cans that hold food and drinks, cardboard boxes, glass jars and bottles, newspaper and office papers, plastic bottles and even playground equipment. Garden waste, such as grass clippings, dried leaves and so on can be similarly converted into compost. Some types of trash are dangerous and need to be disposed of in special ways. Old paints, pesticides, cleaning chemicals, fluorescent lamps, mercury thermometers, batteries and electronic equipment can contaminate our land, water and air.

15. Which of the following trashes need to be disposed off in order to save our environment?

- (A)mercury thermometers
- (B) batteries and electronic equipment. (C)
- (C)Both a or b
- D) none of these
